CFFA

Coalition for Fair Fisheries
Arrangements

CFFA joins the *Pure Salmon* campaign

On May 25th, CFFA joined the *Pure Salmon* campaign which lobbies to raise the standards of farmed raised fish.

The *Pure Salmon* campaign calls on the global salmon farming industry to:

1. Adopt farming methods that eliminate disease transfer and salmon escapes;
2. Eliminate the use of antibiotics, biocides, and harmful chemicals in salmon farming;
3. Guarantee salmon farm waste is not discharged directly into the environment;
4. Stop the current depletion of wild fish stocks caused by the 3:1 ratio of slaughtered fish to salmon growth.
5. Prohibit the use of genetically engineered fish, feed, and other genetic modification;
6. Guarantee that salmon farming does not harm other wildlife;
7. Respect the views of coastal communities and other stakeholders in locating farms; and
8. Adopt and implement ethical business practices, including safe, healthy work environments and fair compensation.

For more information, see *Pure Salmon* campaign website
